SECTION B

3. **The accounting concepts:**
   (a) **Monetary unit concept/ Money measurement concept:** According to this concept, a business transaction will always be recorded and can be expressed in terms of money. most countries would require that financial statements are presented in their local currency, example Tanzanian Shillings (TZS).
   (b) **Matching concept**: This concept implies that revenues should be matched against expenses/costs in order to determine the profit or loss for the particular accounting period.
   (c) **Historical cost concept/cost concept:** This concepts state that, assets should be recorded and reported at their original cost when acquired by an enterprise.
   (d) **Accrual concept:** This concept state that revenue is recognized when they are earned, and expenses are recognized when they are incurred. Regardless of when cash is received or paid.
   (e) **Dual aspect concept/duality concept:** This basic concept in accounts which states that every transaction must be recorded twice. This is the basic concept in accounting.

(5points@2marks=10marks)
