INSTRUCTION

MsomiBora.com

- This paper consists of three sections A,B and C
- Answer all questions in all sections.
- Electronics calculators and cellular phones are not allowed in the examination room.

SECTION A (20 MARKS)

1. Write the letter of the correct answer in the box provided for each of the following questions.
   i. Physics is the scientific study of nature which deals with :- ( )
   A: Behavior of the space. B: Behavior of the universal C: Conservation of energy only. D: Reaction of matter.
   ii. Which of the following is a derived unit? ( )
   A: Kilogram B: Ampere. C: Kelvin D: Newton.
   iii. A vernier caliper is used to measure : ( )
   A: Distance of a car. B: Mass of a car. C: Diameter of a wire D: Length of a table.
   iv. The following is not a relationship between physics and other subject :( )
   A: Sound B: Atomic physics C: Mechanics C: Chlorophyll and DNA.
   v. One of the following is not a safety rule in a physics laboratory : ( )
   A: To sit on a stool B: To follow instructions C: To wear shoes with hard soles D: Handling apparatus.
   vi. A symbol means that a substance is dangerous and can cause death is ( )
   A: Toxic B: Flammable C: Corrosive D: Radioactive.
   vii. Weight is ( )
   A: The quantity of matter in a body. B: The attractive force exerted by the earth on the body towards the center of the earth C: The same at all places on the surface of the earth D: The product of force of gravity and gravitational acceleration
   viii. A person who study physics is known as:- ( )
   A: Physician B: Physikos C: Philosophers D: Physicists.
   ix. Hydrometer is an instrument used to measure ( )
   A: Density of a liquid B: Relative density of liquid C: Specific gravity of a liquid D:All of the above.
   x. Which of the followings are derived quantities:- ( )
   A: mass and weight B: length and mass C: force and pressure D: time and weight
   xi. The shortest length which can be measured by a metre rule is:-
   A: 1.0mm B: 0.1mm C: 10mm D: 100cm
   xii. A spring balance is used to.
   A: measure force B: measure weight C: Both A and B: D: None of the above.
   xiii. First aid is important for the following reason:- ( )
   A: Prevents the injured person from becoming worse. B: It prevent the spreading of malaria
   C: It does not help to preserve life C: First aid procedure. D: It increase the blood of a person
   xiv. A large digital version of stopwatch designed for viewing at a distance such as in sports stadium is called:- ( )
   A: Stop chocks B: Stop watch C: Both A and B are correct D: None of the above.
   xv. A very sensitive weighing balance is known as.( )
   A: Digital balance B: Beam balance C: Lever arm balance. D: Triple beam balance.

xvi. Aim of understanding the behavior of the universe can be described in:- ( )

A: Physics B: Chemistry C: Biology D: Mathematics

xvii. The mass of 1.5 litres of water is ……kg. ( )

A: 15kg B: 1.5kg C: 150 kg D: 0.15 Kg

xviii. $1m^3$ is equal to: ( )

A: 100cm B: $1,000,000cm^3$ C: $1,000cm^3$ C: 1,000,000cm

xix. A students gets electric shock and falls down unconscious in physics laboratory. Which of the following would you do first to help the victim? ( )

A: Call a physics teacher B: Call other students. C: Administer breathing exercise

D: Call a medical doctor. E: Ensuring safety while in the laboratory.

xx. Laboratory rules are useful in:- ( )

A: Making students enjoy science subject B: Making students conduct experimentally freely. C: Ensuring good communication with other students and the teachers. D: Ensuring safety while in the laboratory.

SECTION B (20 MARKS)

2. Match the items in list A with responses in list B by writing the letter of the correct response beside the item number.

LIST A	LIST B
i. Density	A. Kg /m^3
ii. Amount of space occupied by a substance.	B. Volume
iii. Is an attractive force towards the earth center .	C. Measure diameter of a ball
iv. Metre rule	D. Measure length of an object in 0.1cm
v. Beam balance	E. It is used to measure mass of a body.
vi. Spring balance	F. It measure weight of a body in Newton.
vii. Micrometer screw gauge	G. It measure internal and external diameter of a cylinder .
viii. Measuring cylinder.	H. It measure volume of a liquid in m^3
ix. Stop watch.	I. It is used to measure time in second.
x. Vernier caliper	J. Weight

LIST A	i.	ii	iii.	iv	v	Vi	vii	viii	ix	x
LIAT B										

3. i. Mention five examples of fundamental quantities .

a. _____

b. _____

c. _____

d. _____

e. _____

ii. State SI unit of the followings .

a. Density: ……

b. Pressure: ……

c. Weight : ……

d. Speed : ……

e. Mass : ……

SECTION C (60 MARKS)

4. . a. Define the term quantity

_____

b. Mention two types of quantity and Define them.

i._____

ii._____

5. Define the following terms

a.Toxic._____

b. Highly Flammable_____

c.Oxidizingagent_____

d.Corrosive_____

6 a. Give the meaning of the term laboratory

._____

b. Mention two laboratory rules.

i._____

ii._____

7. Fill the table below by writing the correct answer in the empty spaces in each column

S/No.	Quantity	Si unity	Symbol
01.	Mass		
02.	Volume	M^3	
03.	Velocity		
04.	Density.		
05.	Temperature	Kelvin	

8. a. State one use of the following apparatus

(i) Metre rule

_____

(ii) Verniear caliper_____

(iii) Micrometer screw gauge._____

(iv) Spring balance

_____

(v) Measuring cylinder_____

b. What is metre rule?

_____

_____

9. a. What is first aid kit?

_____

_____

b. State five importance of providing the first Aid to an injured person

i._____

ii_____

iii._____

iv._____

10. a. What is fire extinguisher?_____

_____

b. States five types of fire extinguisher whish depending on type of a material used

i. _____

ii. _____

iii._____

iv_____

v._____

c. Explain first three steps to be followed when providing a first aid to a person who get an electric shock.

i._____

iii._____

iii._____

BEST WISHES
