OFISI YA RAIS – TAWALA ZA MIKOA NA SERIKALI ZA MITAA

NAMANGA SECONDARY SCHOOL

BASELINE ORIENTATION COURSE

FORM ONE 2025

PHYSICS EXAMINATION

TIME: 01:00 HRS

INSTRUCTIONS

1. Answer all question
2. All writing should be in blue/black ink but drawings should be done by using a pencil

1. Match the word in column A with their meaning in column B.

COLUMN A	COLUMN B
A. Volume B. Watch C. Cylinder D. Cubic Meter E. Beam Balance F. Tape Measure G. Ruler H. Spring Balance I. Kilogram J. Mass	I. The standard unit of volume II. The quantity of matter contained in a substance. III. Instrument for measuring mass IV. A flexible ruler for measuring length V. An instrument for measuring length and draw straight lines. VI. The standard unit of mass VII. An instrument for measuring weight of body VIII. A small time piece that you wear on your wrist IX. An instrument for measuring the volume of liquids X. The amount of space that an object occupy XI. The fixed volume of a gas.

2. Write true for correct statement and false for statement which is not correct
    a. Laboratory is not found in hospital……
    b. Laboratory rule help us to reduce accidents in the laboratory……
    c. Fire extinguisher is necessary in the laboratory ……
    d. Laboratory door and windows should open outward……
    e. Load of 10 kg of rice can be measured by using beam balance……
3. Mention any three state of matter

    (i)…… (ii)…… (lll)……

(b). What is the difference between volume of liquid in cylinder A and cylinder B given that the volume of liquid in cylinder A is 29 cm^3 and that in cylinder B is 54cm^3

.....

(c). What is a laboratory?.....

(d). Mention 3 science subject which need laboratory in your school.

(i)…… (ii)…… (lll)……

4. (a). what will be you do if you fellow student is involved in an accident in the laboratory?

…….

(b). Why should long hair be tied at the back when you are in the laboratory?

……

(c). Three balls has the same size the first ball is made up of metal the second is made up of wood and the third ball is made up of plastic material.

I. Which ball has great mass……
II. Which ball has small density ……

(d) What instrument is used to measure the sides of the rectangular block?

……
