THE UNITED REPUBLIC OF TANZANIA
THE PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
LONGIDO DISTRICT
ANNUAL JOINT EXAMINATION

FORM THREE
036 INFORMATION AND COMPUTER STUDIES
MARKING SCHEME NOVEMBER 2024

SECTION A: 16 Marks

1. **@01 Marks=10MARKS**

A	C	D	C	B	E	D	A	D	C

2. **@01 Marks=06marks**

	ii	iii	iv	v	vi
E	G	A	C	D	B

SECTION B: @09 Marks =54 Marks

3. (a) Internet Services Provider is a company that provides access to the internet.(1.5marks)
   (b)-Explain any three points **@02 marks=06 MARKS**
   Processor (CPU) speed, Hard Disk capacity, RAM, Windows version, Video Graphics Array port andexternal input and output devices.
   (c) **@0.5Marks=02 MARKS**
   i. Parallel
   ii. Serial
   iii. USB

4. (a)**01marks**
   -Creating a copy of your data in case the original is lost or corrupted.
   (b)**@02 Marks=08 MARKS**
   i. Disk formatting is a process of preparing data storage devices such as a hard disk drive or USB flash drive for initial use.
   ii. Partitioning is dividing hard drive into logical sections that can be assigned different drive letters and file systems.
   iii. Compression is a technique which is used to compress files.
   iv. Defragmentation is the process of rearranging all files and directories into one contiguous area of disk.

5. (a) Explanation **@01 Marks=03MARKS** nyalulubogirls@gmail.com.
   i. Username(nyulululubo)-The own name of e-mail user.
   ii. Separator (@)-Separating username and domain name.
   iii. Domain name (gmail.com)-The name of the email server and type of company.

   (b) (i)A search engine is a software that is used to search for reaources on the Web basedon the keywords that you designate as search terms.**(02 marks).**

   (ii) Googe,Yahoo,Bing, Msn,ask,Baidu,DuckDuckGo etc **any two(2)@0.5Marks=01MARKS**

   (c) **@01marks=03MARKS**

   (i) Downloading means your computer is receiving data from the Internet and Uploading means data isbeing sent from your computer to the Internet.

   (ii) A network is a collection of two or multiple connected computer systems that may share resources, such as an internet connection, an app, a printer and the internet is a network of interconnected devicesthat are spread around the globe.

   (iii) User **Log in** is the process of accessing their existing account and user **sign up** is creating a newaccount.

6. (a)Job scheduling is the process where different tasks get executed at pre-determined time or when the right happens or Job scheduling is basically the process in which a process (tasks) is selected to be brought into a queue **(02Marks).**

   (b) **Explanation @01marks=03MARKS**

   -A graphical user interface (GUI) is familiar to most users of PCs and laptops where everything (feature) is displayed and represented by icons (windows, androids and iPhone OS).

   - Command line interface (CLI) is text-based and users control the computer by typing in commands (windows and linux/unix).

   -A menu-driven interface is a type of user interface where users interact with a program or system through a series of menus (present options or commands) that the user can select, typically through the use of a pointer, keyboard, or touchscreen, simplifying the interaction with the system.(example Cashpoint machines-ATMs, Fuels station,..)

   (c) **@02Marks=04MARKS**

   (i) The firmware is the computer's essential software which contains programs to perform a Power On Self-Test (POST) when the computer is turned on to determine whether it functionsproperly

   or

   The Firmware is a microbe or program that is embedded into the memory (ROM) of hardware devices to help them operate smoothly (Computer, printer, camera, mobile phone, scanner, TV and Remote)

   (ii) Proprietary software is software that privately owned, controlled, and distributed under specific licensing terms that restrict users' rights to modify, distribute, or access its underlying source code (example Microsoft Windows).

7. (a) **01marks**

   -A computer virus is a type of malicious software, or malware, that spreads between computers and causes damage to data and software.

   (b) Any four sources **@01 mark=04MARKS**

i. Opening suspicious email attachments
ii. Attaching unsecured removable or external storage devices (e.g., flash drives, external hard drives, memory cards)
iii. Accessing malicious websites
iv. Clicking malicious ads
v. Downloading malicious and unlicensed applications
vi. Online gaming

(c) Any four measures **@01marks=04MARKS**

i. Keep up-to-date software
ii. Antivirus software
iii. Antispyware software
iv. Firewalls
v. Choose strong passwords
vi. Use stronger authentication
vii. Be careful what you click
viii. Shop safely

8. **Answer**

i. =MAX (B3:B9) **02marks**
ii. =B8*C8 **02marks**
iii. =AVERAGE (B3:B9) **02marks**
iv. =B6+ (B6*15%) **02marks**
v. = (B7*C7)*10% **01marks**

9. (a) **@0.5 marks=02MARKS**

i. BIOS means Basic Input-Output System
ii. URL means Uniform/Universal Resource Locator
iii. WWW means World Wide Web
iv. HDMI means High-Definition Multimedia Interface

(b) 0**7Marks**

```
<html>
<head><title>login form</title></head>
<body>
<form>
<p><h1><img src="log1.jpeg">NECTA PREMS</h1></P>
```

01Marks

0**1 Marks**

```
<p>Username<br><input type="text"></P>
<p>Password<br><input type="password"></P>
<p><input type="submit" value="Sign In"></P>
<p><a href="forgetfile.html">I forgot my password</a></P>
```

0**4 Marks**

```
</form>
</body>
</html>
```

0**1 Marks**

SECTION C: 30 MARKS

Any two (2) @ 15 Marks =30 MARKS

10. Four common security measures practiced to protect information.

Good Introduction (01.5 marks)

-Meaning of information security

Main body (@point 01marks + Good explanations 03 marks =04 marks)=15 Marks

Any four(4) points

- Password
  - Biometric
  - Firewall and
  - Data encryption

Good Conclusion (01.5 marks)

11. How Information and Computer Studies relate to other subjects such Physics, Chemistry andBiology?

Good Introduction (01.5marks)

-Meaning of Information and Computer Studies

Main body (@point 01 marks + Good explanations 03 marks =04 marks)=15 Marks

Any four(4) points

- Simulating experiments
- Drawing graphs
- Searching Materials
- Processing data
- Keeping recording
- Giving presentations

Good Conclusion (01.5marks)

12. Four advantages of using electronic spreadsheets

Good Introduction (01.5 marks)

-Meaning of Electronic and traditional spreadsheet

Main body (@point 01 marks + Good explanations 03 marks =04 marks) =15 Marks

Any four(4) points

- It provides features that can be used to automatically update a document when numerical figuresin the cells are altered.
- It always produces correct results, provided that correct formulae are used.
- It produces neat work in a variety of good quality formats.
- It contains tools that provide additional support such as spell checking and punctuations.
- It can easily convert data into other forms of visualisation such as graphs and charts.
- It offers powerful features to organise, manipulate, manage, verify and transfer data, such asuploading a file into a database system.

Good Conclusion (01.5 marks)
