THE PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
LONGIDO DISTRICT

FORM THREE TERMINAL EXAMINATION
036 INFORMATION AND COMPUTER STUDIES

Time: 3 Hours **Thursday, 29th May 2025 a.m.**

Instructions

1. This paper consists of sections **A**, **B** and **C** with a total of **eleven** questions.
2. Answer **all** questions in sections A and B, and only **two** questions from section **C.**
3. Section **A** carries **16 marks**, section **B 54** marks and section **C** carries **30** marks.
4. Cellular phones and any unauthorized materials are not allowed in the examination room.
5. Write your **name on** every page of you answer sheet(s)
6. All answers must be written in **black** or **blue** ink and pencil for drawings.

SECTION A (16 MARKS)

Answer **all** questions in this section

1. For each of the following items (i) - (x), choose the correct answer from the given alternatives and write its letter beside the item number in the answer sheets provided.

   i. Which term represents the results of the processing raw facts like numbers, symbols, letters, pictures, video and sounds in a computer?
   A. Program
   B. Data
   C. Figure
   D. Information
   E. Website

   ii. To prepare a computer laboratory for the Form Four final examination, the headmaster of Seypalm secondary school asked the computer laboratory technician to buy a non – impact printer which is very fast and which could produce printouts of higher quality. Which type of printers will be the best choice?
   A. Inkjet printer
   B. Thermal printer
   C. Laser printer
   D. Dot matrix printer
   E. Daisy wheel printer

   iii. Why do microcomputers need application software?
   A. Executes a variety of fundamental operations
   B. Executes a variety of system utility

C. Executes routine service such as file handling
D. Executes specific task demanded by the user
E. Executes a variety of real time operations

iv. Modern Education Institute has a Local Area Network in its Primary School and another set in its Secondary School, which are located in the same Region. Which device is needed to connect two LANs to enable data sharing and resources between them?
A. Modem
B. Hub
C. Switch
D. Router
E. Gateway

v. A text on the websites which enables computer user to jump from one page of the website to another.
A. Webpage
B. Hyperlink
C. Homepage
D. Hypertext
E. Hypermedia

vi. The following is not the component of page layout in Microsoft word
A. Page Size and Themes
B. Shape and view
C. Page margins and orientation
D. Page breaks and columns
E. Page size and Line number

vii. While preparing a Form Four Mock Examination results in a worksheet, a teacher noticed an error message #VALUES! What does this error signify?
A. Use of a blank cell or dividing by zero
B. Use of incorrect numeric value to the formula
C. Use of incorrect cell reference to the formula
D. Use of incorrect formula
E. The column is wide enough to accommodate the value

viii. Most of the doctors in a certain hospital that uses computers in performing their daily activities reported the problem of disappearing of some files. Which is the best way of preventing data from loss and damage?
A. Using password
B. Using antiglare screen
C. Updating ant-virus
D. Switch device
E. Backing up the file.

ix. Which language is directly understood by the computer without translation program?
   A. Machine language
   B. High level language
   C. FORTUNA language
   D. BASIC language
   E. Assembly language

x. How can you differentiate third computer from second computer generation?
   A. Third computer uses transistor while second computer use vacuum tube
   B. Third computer uses vacuum tube while second computer use transistor.
   C. Third computer uses microprocessor while second computer use transistor
   D. Third computer use integrated circuits while second computer use transistor.
   E. Third computer use AI while second computer use microprocessor

2. Match the following responsibilities in **List A** with their corresponding career opportunities in **List B** by writing the letter of the correct option beside the item number in your answer sheet.

LIST A	LIST B
i. Entering data in to the computer for processing, keeping up-to-date records of all information processing activities and activating the computer to obey programs through use of commands.	A. Computer engineer B. Computer programmers C. Network administrator D. Computer operator E. Database administrator F. Computer typesetter G. Computer technician H. Software engineer I. Web administrator J. Wed designer K. Computer trainer L. Internet administrator M. Information manager
ii. Troubleshooting computer hardware and software related problems and ensuring that all computer related accessories such as printers, storage media are in good condition.	
iii. Training people on how to use computers and various application programs and guide learners on how to acquire knowledge through carrying out research.	
iv. Design and develop computer components, example motherboards, storage devices, manufacturing computer-controlled devices such as robots and re-engineer computer components to enhance its functionality and efficiency.	
v. Developing system and application software and maintaining and updating the software to meet day-to- day requirements.	
vi. Debugging of programs, testing of programs for logical errors, syntax and semantic errors and coding computer program using appropriate programming language	

SECTION B (54 MARKS)

Answer **all** questions in this section

3. Communication media are tools or equipment which are used to transfer and receive data or information from one destination to another, or from one computer to another computer. Communication media is also classified into two categories: **guided media** and **unguided media.** One of unguided media is **wireless technology:**

(a) Give two examples of wireless technology

(b) Outline two benefits and two disadvantages of the use of wireless technology

(c) Define the term guided media and give one example of guided media

(d) Differentiate between guided media from unguided media

4. Bariadi Town Council Secondary Education Officer requested all headmasters and headmistress to purchase microcomputers for data processing, and teaching and learning materials accessing tool. One of Secondary School decided to purchase desktop computer and install Microsoft Windows Operating System which provided graphical user interface to the computer users to communicate with a computer through hardware.

(a) Explain two factors that the school considered to install Microsoft Windows Operating system rather than other operating systems.

(b) Outline three ways in which operating systems can be classified

(c) Briefly explain three types of operating systems according to user interface and suggest the one proper type of operating system will be correct working in a desktop computer.

5. During class lesson of Information and Computer Studies Subject, you noticed that your fellow students mixed up between the concept of a file and a folder.

(a) Briefly explain the difference between a file and a folder.

(b) Which steps would you follow to create the folder on the desktop?

(c) Which steps would be followed by students in order to save word processing file in the created folder?

6. Seypalm Secondary School keeps a spreadsheet of monthly test results in four subjects. Study the following worksheet and then answer the questions that follow:

	A	B	C	D	E	F	G	H
1	**Students details and Marks**							
2	**Name**	**Class**	**Maths**	**Science**	**IT**	**English**	**Average Mark**	**Pass/Fail**
3	Allen	11A	33	24	19	44	30	FAIL
4	Dyos	11B	41	54	70	31	49	PASS
5	Kegg	11A	82	69	57	52	65	PASS
6	Khan	11C	44	21	50	85	50	PASS
7	Kolacz	11A	73	51	73	51	62	PASS
8	Lenski	11B	48	41	40	47	44	FAIL
9	Peruza	11C	87	72	64	61	71	PASS
10						**Total Passed**		**5**
11	**Total marks for all subjects**				**1484**	**Total failed**		**2**

(a) Write the function used to calculate average mark of students in cell G6

(b) State the expression that would be used in cell A10 to obtain the least English mark

(c) Noted that the average mark for pass was 45 and above ,by using IF function write the

function entered in cell H3 to display results of "PASS" or "FAIL"

(d) Write the function that used to calculate the number of students failed the monthly test in H11

(e) Distinguish between filtering and sorting

7.(a) A college has purchased some microcomputers for teachers to store data, for searching teaching and learning materials, and information.

i. Describe three ways technology has enhanced productivity at the workplace.

ii.Explain two health problems that may result from prolonging use of computers by the teachers and state how each problem can be minimized

(b) One of the challenges that computer users in any organizations face is unauthorized access to the computer system. Describe two computer crimes taking place in organizations and two control measures that can be put in place to curb them.

8. (a) i. Define the term an HTML File?

ii. Write a simple HTML Document structure tags (codes), **Hints** Title of web page – Ntuzuss Form three ICS, head (Write your first name and should be **bolded**), and write two paragraphs (first paragraph , introduce yourself ,title of your paragraph is **INTRODUCTION**, second paragraph, which school and class you are studying as well as total subject you are offered, title of your paragraph is **MY SCHOOL**) all Paragraphs title should be formatted by (**H1**) .

(b) Explain why html code must be written between <body> and </body>

SECTION C (30 MARKS)

Answer **only two** questions from this section

9. ICS teacher connected his computer to the internet for downloading teaching and learning materials. unfortunately, the internet slows down when loading and takes a long time to open the webpage. Explain four factors likely to affect the speed of his internet connection.

10. Technology has improved education and learning processes. Describe any four ways in which technology can be used to assist you with your studies.

11. Mwanga Secondary School stores examination results and students' reports in academic dean's computer. The academic dean doesn't know the risk behind keeping school's important information in her computer without backup. Explain four risks the school faces by not creating a backup.
