PRESIDENTS OFFICE
LONGIDO DISTRICT COUNCIL
FORM ONE MIDTERM EXAMINATION

MARKING PAPER

MARCH 2024

1 (a) $7/10 \div (2/5 + 4/15) \times 3/5$

Candidate has to apply idea of BODMAS

$7/10 \div \left(\frac{6+4}{15}\right) \times 3/5$ (01 Mark)

$7/10 \div 10/15 \times 3/5$ (01 Mark)

$7/10 \times 15/10 \times 3/5$ (01 Mark)

$105/100 \times 3/5$

$\frac{105 \times 3}{100 \times 5} = 63/100$ (01 Mark)

$\therefore 7/10 \div (2/5 + 4/15) \times 3/5 = 63/100$ (01 Mark)

(b) $54 = 1 \times 54$
$= 2 \times 27$
$= 3 \times 18$ (03 Marks)
$= 6 \times 9$

Factors of 54 are 1, 2, 3, 6, 9, 18, 27 and 54 (02 Marks)

2 (a) Candidate has to apply the idea of operations Correctly

Each day = 756550 Tanzanian shillings

for 92 days $= 756550 \times 92$ (02 Marks)

$= 69,602,600$ Tsh (01 Mark)

If 1865950 Tsh was used to build fence

The Money left was $69602600 - 1865950$ (02 Marks)

$= 50951650$

∴ The money left was 50,951,650 Tanzanian shillings (01 Mark)

(b) Candidate has to apply the knowledge of Multiple and Common Multiples

4 = 4, 8, 12, 16, 20 (02 Marks)

6 = 6, 12, 18, 24, 30 (02 Marks)

∴ The first Common Multiple is 12 (01 Mark)

Scanned with CamScanner

3 (a) LCM of 3 and 5 is 15 (01 Mark)

$\frac{2}{3} \times 15 = 10$ (01 Mark)

$\frac{1}{5} \times 15 = 3$ (01 Mark)

$\frac{2}{3} > \frac{1}{5}$ (01 Mark)

$\therefore \frac{2}{3}$ is greater than $\frac{1}{5}$ (01 Mark)

(b) Candidate has to find HCF to get the size of squares

2	54	78
3	27	39
3	9	13
3	3	13
13	1	13
	1	1

(02 Marks)

HCF = 2 × 3 = 6 (01 Mark)

The size of each square is 6 centimeters. (01 Mark)

4 (a) $0.8 \div 0.25$

$\frac{0.8 \times 100}{0.25 \times 100}$ (02 Marks)

$\frac{80}{25} = \frac{16}{5}$ (02 Marks)

$\therefore 0.8 \div 0.25 = \frac{16}{5} = 3.2$ (01 Mark)

(b) let P be her income (01 Mark)

She spent → $\frac{7}{9}P$ (01 Mark)

Remained with 88100 Tsh.

$P = \frac{7}{9}P + 88100$

$9P = 7P + 792900$ (01 Mark)

$9P - 7P = 792900$

$\frac{2P}{2} = \frac{792900}{2}$ (01 Mark)

$P = 396,450$ (01 Mark)

Linda's income is 396450 Tanzanian shillings

Scanned with CamScanner

5 (a) If it uses 7.25 litres to travel 98.6 KM (02 Marks)

1 litre = x?

$\frac{7.25x}{7.25} = \frac{98.6}{7.25}$ (01 Mark)

$x = 13.6$ km (01 Mark)

It travel 13.6 kilometers using 1 litre (01 Mark)

(b) i) 2456012 Thousands (02.5 Marks)

ii) 81765093 Ten Millions (02.5 Marks)

---

6 (a) Odd numbers 1, 3, 5, 7, 9, 11, 13 (02.5 Marks)

Prime numbers 2, 3, 5, 7, 11, 13 (02.5 Marks)

(b) Percentage of people who didn't know

$= \frac{60}{1000} \times 100\%$ (03 Marks)

$= 6\%$ (01 Mark)

The number of people who didn't know how to ride is equal to 6%. (01 Mark)

---

7 (a) Positive → $\frac{1}{8} \times 2400$ people = 300 people (02 Mark)

Negative → 2400 people − 300 positive covid-19 people (1 Mark)

→ 2100 people (01 Mark)

∴ 2100 people were tested Negative (01 Mark)

(b) let b represent the Money of the boy (01 Mark)

$\frac{35}{100} b$ → He bought books (01 Mark)

26000 Sh → was left

$b = \frac{35}{100} b + 26000$ (01 Mark)

$100b = 35b + 2600000$ (01 Mark)

$100b - 35b = 2,600,000$

$\frac{65b}{65} = \frac{2600,000}{65}$ (01 Mark)

$b = 40,000$ ∴ The boy had 40,000 Tanzanian Shillings

Scanned with CamScanner

8 (a) $0.732 + 3.02 + 0.009 + 10.981 - 4.06$

0.732
3.02
0.009
$+\ 10.981$
14.742 (02 Marks)

then $14.742 - 4.06$
10.682 (01 Marks)

$\therefore 0.732 + 3.02 + 0.009 + 10.981 - 4.06 = 10.682$ (01 Marks)

(b) let $x = 0.\dot{8}\dot{3}$ (01 Marks)

$100x = 83.\dot{8}\dot{3}$ (01 Marks)

$100x - x = 83.\dot{8}\dot{3} - 0.\dot{8}\dot{3}$ (01 Marks)

$99x = 83$

$\frac{99}{99} \quad \frac{99}{99}$ (01 Mark)

$x = 83/99$

$\therefore 0.\dot{8}\dot{3} = 83/99$ (01 Mark)

9 (a) i) Hostellers = 440 students − 110 students (01 Mark)
= 330 students

In fraction → $330/440 = 33/44$ (01 Mark)

∴ Fraction of hostelled students is $33/44$

ii) Percentage of day scholars = $\frac{110 \text{ day scholars}}{440 \text{ Total Students}} \times 100\%$ (02 Marks)

$= 1/4 \times 100\%$ (01 Mark)

$= 25\%$

∴ Percentage of day scholars is 25%. (01 Mark)

(b) $6800 \times 12 + 78365 \div 5$ Applying BODMAS (02 Marks)

$6800 \times 12 + 15673$ (01 Mark)

$81600 + 15673$ (01 Mark)

97273 ∴ $6800 \times 12 + 78365 \div 5 = 97273$ (01 Mark)

Scanned with CamScanner

10 (a) i) 95764 (02.5 Marks)
ii) 46789 (02.5 Marks)

(b) 9267 Nine Thousand two hundred Sixty Seven (02.5 Mark 1)
1004309 One Million and four thousands three hundred and nine. (02.5 Mark 1)

Scanned with CamScanner
