THE PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
LONGIDO DISTRICT

FORM ONE TERMINAL EXAMINATION
041 BASIC MATHEMATICS

Time: 2½ Hours **Monday, 26th May 2025 a.m.**

INSTRUCTIONS

1. This paper consists of ten (10) compulsory questions.
2. Show clearly all the working and answers in the space provided.
3. Four figure mathematical tables, geometric instruments and graph papers may be used where necessary.
4. Any unauthorized materials are not allowed in the examination room.
5. Write your examination number on every page of your answer sheets.

QUESTION #	MARKS	INITIALS OF EXAMINER
1		
2

Total		

1. (a) i. Convert $2.6\dot{3}$ into the simplest fraction.

ii. Round off 179.995 to four significant figures

(b) How many significant figures are in each of the following numbers?

i. 64 500 centilitres ……..

ii.0.645000 ……

iii. 213.20130 ……..

iv.108 000 ……..

2. (a) Graph the solution of the following: $|2 - x| \leq 5$

(b) A man's monthly income is 1 274 000 shillings. He spends 1 078 000 shillings every month. Find the ratio between his income to expenditure and savings to income.

3. (a) Estimate the value of the following: 48×91

(b) Estimate the number of $46\ cm\ by\ 46\ cm$ tiles which will be required to cover a room measuring $3.84\ m\ by\ 2.98\ m$

4. (a) Find $(5x - 2y) : (3x - y)$ in its lowest form if $x: y = 49$.

(b) Find the absolute value in each of the following numbers

i. -52

ii. $\frac{1}{2} - \frac{3}{4}$

iii. $\frac{6\frac{2}{3} \times 2\frac{4}{5} - 3}{\left(2\frac{2}{3} \times 2\frac{4}{5}\right) - 3}$

5. (a) Identify each of the following as rational or irrational numbers: 0.75 , $\frac{90}{12007}$, $\sqrt{7}$, $\frac{1}{\sqrt{2}}, \pi$

(b) Represent on a number line all real numbers $x \ \ such\ that\ x < \frac{5}{3}$

6. (a) Solve for the value of $z\ if\ \frac{5}{3}(3z - 2) = 10$

(b) Solve the following simultaneous equations $\begin{cases} \frac{x}{2} + \frac{y}{5} = 4 \\ \frac{x}{4} + \frac{y}{2} = 6 \end{cases}$

7. (a) Write the following numbers in ascending order: $\frac{11}{23}$,$0.4\dot{7}\ddot{2}$, $and\ \frac{5}{11}$

(b) Solve for in the following inequality: $4 - x < 10$

8. (a) Represent $2 < x < 5\frac{1}{4}$ on a number line where x is a real number

(b)Evaluate $2.\dot{6} + 3\frac{3}{4}$

9. (a) The sum of two numbers is 30.The difference between the larger number and three times the smaller number is 2. Find the two numbers.

(b) Explain five mathematical skills that are useful in your daily life activities

10. Seypalm gave $\frac{7}{25}$ of his money to his son, $\frac{2}{9}$ of the remaining amount to his daughter, and the rest amount to his wife .If his wife got 1 198 400 shillings;

i. How much money did he has in total?

ii. Estimate the amount of money to the nearest hundred thousand collected by his daughter
