MKALAMA DISTRICT COUNCIL

FORM ONE TERMINAL EXAMINATION

BASIC MATHEMATICS

TIME: 02:30HRS **May 2025**

. Instructions

1. This paper consists of ten (10) compulsory questions. Each question carries ten (10) marks. Answer all questions.
2. All writings must be in blue or black ink. Use a pencils for drawing.
3. Writ your name on every page of your answer sheet(s)

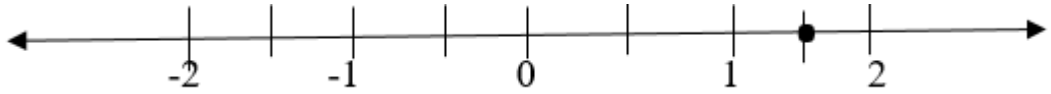

1. (a) Mathematics is categorized into several branches, write three branches of mathematics.

(b) Identify three activities that involve use of mathematics concept in geography.

2. (a) Represent $\frac{4}{3}$ on a number line

wazaelimu.com

(b) Read the rational number from the number line

3. (a) Fill the blanks with the sign $< or > or =$ to make a correct mathematical statement. Note that 'a', 'b' and 'c' represent real numbers.

(i) If $a = b$ and $b > c$, then a_____c

(ii) If $a > b$ and $b > c$, then a_____ c.

(b)Which fraction is greater $\frac{1}{4}$ or $\frac{3}{7}$?

4. (a) Identify irrational numbers from the set of numbers

$\left\{\sqrt{9}\ ,\ \frac{\sqrt{2}}{2}\ ,\ \frac{1}{11}\ ,\ \pi,\ \sqrt{3},\ \frac{\pi}{4},\ 0.54,\ \frac{3}{4}\ ,\ \frac{-\sqrt{5}}{3}\right\}$

(b) Write Five rational numbers which are equivalent to $\frac{3}{4}$

5. (a) Round off each of the following numbers according to the given instructions.

(i) 0.267 (to the nearest tenths)

(ii) 17. 82 (to the nearest ones)

(iii) 63504 (to the nearest thousands)

(b) Find the value of 0.3143×6.06 giving the answer correct to 3 decimal places.

6. Represent the following inequalities on a number line where X is a real number.

a) $-\frac{3}{4} \leq x < 2$

b) $x \leq \frac{3}{2}$

7. (a)Evaluate $2.\dot{3} + 0.\dot{3} - 2.\dot{4}$ give your answer in form of $\frac{a}{b}$ where $b \neq 0$

(b) Convert the following fractions into decimals.

(i) $\frac{1}{3}$ (ii) $1\frac{5}{9}$

8. (a) Find the absolute value of $\frac{1}{4} + \frac{1}{2} - 2$

(b) Evaluate $|3 - 5| + |12 \div 3| - 5 \times 2$

9. A monthly salary of a worker is Tsh.270, 000. Two third of this salary is used to buy food and one half of the remaining money is used to buy a pair of shoes.

a) How much money is used to buy a pair of shoes?

b) Write the fraction of salary used to buy food in decimal.

10. Amina and her 3 friends bought 12 bottles of soft drink from a school shop at a price of 600 shillings per bottle. If the total cost was shared equally among themselves, how much each person paid.
