CATHOLIC DIOCESE OF MOSHI
USSERI SECONDARY SCHOOL
MID TERM TEST MARCH 2025
BIOLOGY FORM ONE

TIME: 2:00HRS

Instructions

1. Answer all questions in each section
2. write your name in any page
3. All drawing should be in pencil.

Section A

1. Mr. Matoboki taught form one students that (i) _____ is the branch of science deals with the study of life. Also according to this subject there are three main branches of biology which are (ii)_____, (iii)_____,and (iv) _____ further more he said that. A person who studies Biology is called (v)_____. Living things are also called organisms. They include animals and plant other microorganism which are very small living things such as bacteria and some protozoan which can not be seen with the naked eyes. Those very small organisms can be seen by using instrument called (vi) _____ Also he said that living organisms are made up of (vii)_____ which is the basic unit of life. A person who is specialized in the study of animals is called (viii) _____ the term biology originates from two Greek words which are (ix) _____ and(x) _____ Bios that means(xi) _____ and logos that means (xii)_____ he taught us also that Biology is not an isolated field of study. This means that Biology is related to many other fields of study such as veterinary, (xiii)_____, medicine,(xiv)_____, pharmacy, (xv)_____, he provides also to us the importance of studying biology by telling us that biology is very important because it helps us to understand our self better.

2. Form one student they are debating that the study of biology is like wastage of time by using five points opposes this statement.

i. _____ _____
ii. _____
iii. _____
iv. _____
v. _____

03. Kingwendu and joti performing an experiment in the laboratory to observe the very small specimens by using microscope the magnification of the specimen show that, the size or length of drawing is 8cm and the actual length of object is 2cm.

(a) Calculate the magnification of the specimen.

(b) Give out the name of the apparatus used to

i. catch small flying organisms such as butterflies _____
ii. Magnifying specimens that are under observation._____
iii. Used to catching fish and other aquatic organisms._____
iv. Measure the temperature. _____

4. Draw and label atleast five parts of light microscope.

5. Observation is one of the methods of studying biology or living things by using sense organs foristance have a coconut, you can use your sense organs to determine that.

i. it is round by _____
ii. it contains a liquid by hearing the sound when shake by using _____
iii. it has rough husk by _____
iv. it has good smell by _____
v. it has a sweet taste by _____

6. Scientists use scientific procedure to solve different problems scientifically; the following are the scientific methods.

1. Problem identification
2. ……
3. ……..
4. Observation and recording
5. ……
6. ……
7. ……..

7. John attempted to observe plant cells using a prepared slide under a light microscope but he was unable to obtain a clear image due to the following challenges

a) the slide contain specimen did not settle on the stage for observation
b) he was unable to achieve sharp focus
c) the image was too bright making it difficult to see the detail of specimen

Educate your friend on how to address the challenges faced in order to obtain a clear image of the plant cells.

a) _____
b) _____
c) _____

8. Give the different between animal and plant cells five points.

PLANT CELL	ANIMAL CELL

9 give out the function of the following part of cell

i. nucleus _____
ii. cytoplasm_____
iii. cell membrane_____
iv. cell wall _____
v. mitochoridrion_____

10. Draw and label animal cell

CATHOLIC DIOCESE OF MOSHI
USSERI SECONDARY SCHOOL
MID TERM TEST MARCH 2025
BIOLOGY FORM TWO

TIME: 2:00HRS

Instructions

1. This paper consists of section A,B and C with a total of ten (10) questions
2. Answer all questions.
3. Section A and C carries Thirty (30) marks each and section B carries seventy (70) marks.
4. All writings must be in blue or black ink except drawing which must be in pencil.
5. Cellular phones and any unauthorized materials are not allowed in examination room.
6. Write your Examination number at the top right corner of every page.

SECTION A

1. For each of items (i)- (x) choose the most correct answer among the alternatives and write its letters beside the item number in the box provided.

i. Immunity is the ability of the body to defend itself against infections. Which one of the following types of immunity involves passage of antibodies from mother to unborn baby across the placenta?
   a. Natural passive immunity
   b. Artificial active immunity
   c. Artificial passive immunity
   d. Artificial active immunity

ii. A person picks up a telephone after hearing it ring. Which characteristics of living things is the person showing by this action?
   a. Movement and locomotion
   b. Movement and irritability
   c. Growth and response
   d. Development and response

iii. Which apparatii are used for heating substance in biology laboratory?
   a. test tube holder and thermometer
   b. spirit burner and Bunsen burner
   c. Bunsen burner and thermometer
   d. spirit lamp and test tube rack

iv. when two organisms live together for their mutual benefit the relationship is called:
   a. commensalism
   b. symbiosis
   c. epiphytism
   d. saprophytism

v. conditions or factors that can change or be changed in an experiment
   a. hypothesis
   b. problems
   c. variables
   d. conclusions

vi. The residents of a certain village in Iringa feed on meat, beans and stiff porridge. In order for their health to improve, which of the following would you advise them to add to their present diet?
   a. Fish and sweet potatoes
   b. fruits and green vegetables
   c. water
   d. bread and green vegetable

vii. all of the following are found suspended in the plasma except:
   a. red blood cells
   b. platelets
   c. capillaries
   d. white blood cells

viii. Why bryophytes are the most primitive plants on earth?
   a. they grow on wet areas
   b. they do not produce seeds
   c. they reproduce asexually and sexually
   d. they lack vascular tissues

ix. People who are always talking while eating are most likely to be;
   a. highly respective
   b. express bad manner
   c. express good manners
   d. good role model to other

ix. Which of the following is among the products of an aerobic respiration in plants?

a. ethanol
b. lactic acid
c. oxygen
d. hydrogen

ANSWERS

i	ii	iii	iv	v	vi	vii	viii	ix	x

2. Match the terminologies used in kingdom plantae and kingdom fungi in list A with the response in list B by writing the letter of the correct response beside the item number.

LIST A	List B
i. Sac like structure which produce ascospore. ii. leaflet in fern plant iii. male reproductive structure in moss plant iv. group of sporangia in fern plant v. Female reproductive structures of moss plant	A. Rhizopus B. Penicillium C. Asci D. Pinnae E. Frond F. Antheridia G. Archegonia H. Hyphae I. Sori

LIST A	i	ii	iii	iv	v
LIST B					

SECTION B

3. (a) Briefly explain what will happen if chloroplast is removed from plant cell?

i) _____
ii) _____

(b) In four points, show how cheek cell and onion cell are similar.

a. _____
b. _____
c. _____
d. _____
e. _____

(c) Draw the diagram of plant cell as seen under light microscope and label any four parts

4. (a) Many children at Sonineka village have swollen abdomen and extremely thin arms and legs due to deficiency supply of a particular food in their bodies.

(i) What is the nutrition deficiency do the children suffer from?

_____

(b) A part from swollen abdomen and thin hands and legs, what the symptoms of this nutrition deficiency (any three points)

i. _____
ii. _____
iii. _____

c) (i) Give any four natural foods that you can advise the people from Sononeko to fees their children.

i. _____
ii. _____
iii. _____
iv. _____

(ii) Name the food substances found in the food mentioned in part (i) above and give two roles of each to human body _____

_____

_____

5. (a) A bread was put in a wet cupboard after few days black thread like structures which ended up in bulb like shape appeared on the bread.

i. Write the common name of the organism that grew on the bread surface _____
ii. name the kingdom in which the organism belongs _____
iii. name the phyla in which the observed organism belongs _____
iv. State two advantages of the kingdom into which the organism named in (a) above belongs……..…… and ……

(b) Tanzania Government has been insisting the provision of vaccine to its children under 5 years old. List four common diseases against which children are immunized.

i. ……..
ii. ……..
iii. ……..
iv. ……..

(c) Write a word equation for aerobic respiration.

……

6. A group of form I students from Iliboru Secondary school had a study visit Mount Meru Hospital in Arusha. They noted a patient with sunken eyes, severe dehydration, weak pulse, deep breathing vomiting and watery diarrhea like rice water.

a) What could be the possible disease that the patient was suffering from?

……..

b) Briefly explain four control or preventive measures of the disease mentioned in (a) above.

i. ……
ii. ……
iii. ……
iv. ……

7. a) Abdul – basit was talking to his friends about condition of his young brother who always attacked by diseases. His friend responds that maybe your young brother has weak immunity. How can he advice Abdul – basit so as to improve his young's brother immunity?

i. _____
ii. _____
iii. _____
iv. _____

b) A child complains to her mother that she had a headache and joint pain. She also feels uneasy, vomits and has abdominal pain. Her mother realizes that the child also has a fever. She takes her to the hospital.

i. Which diseases do you think the child is suffering from?

_____

ii. What is the cause and mode of transmission of the diseases?

_____
_____
_____

c) How can the diseases named in 7(b) (i) be prevented?

i. _____
ii. _____
iii. _____

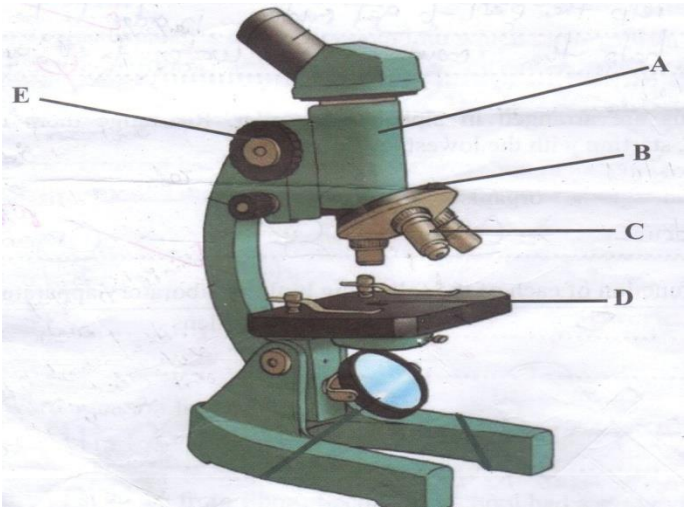

8. (a) On the way to school, Naomi saw the following materials along the road; broken glasses, ripe banana peelings, syringes, old newspapers and water from bathroom.

i. Name the materials from the above list that can be recycled. …….....
……..

ii. Give one effect of those materials in the place where they were placed.
……..

iii. From the above list, name one example of clinical waste ……..

b) Name the parts of the microscope labelled A-E in the diagram below and state the function of each

PART	NAME	FUNCTION
A		
B		
C		
D		
E		

9. (a) According to the laboratory rules, what should you do it in the following?

   a. while boiling water alone, you realize that you need to get book from the classroom_____

   _____

   b. you need to switch off electricity _____

   _____

   c. One of your classmates has brought some chocolate in the laboratory.

   _____

   _____

   d. Your classmate is bitten by a bee during learning activities.

   _____

   _____

SECTION C

10. POMBESICHAI got an accident when he walking alone and when he was admitted to the hospital, he was advised by doctor to use a certain type of food for recovering and repairing his body.

(a) Suggest the food type he was advised to use.
(b) List down three natural sources of food suggested above in 10 (a)
(c) Outline three roles of the food suggested above in 10(a)
(d) Identify and explain three effects and four symptoms of the disease which results when the individuals below five years old lack the food named in 10(a) above in the diet.

ANSWERS

……
……
……
……
……
……
……
……
