REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
ONE WORLD, BISHOP ALPHA AND KINDOROKO SECONDARY SCHOOLS
FIRST FORM FOUR JOINT PRE – MOCK ASSESSMENT

033/2A **BIOLOGY 2A**

(ACTUAL PRACTICAL A)

(For Both Private and School Candidates)

Time: 2:00 Hours **Year: 2025**

Instructions

1. This paper consists of **two (2)** questions. Answer **all** questions.
2. Each question carries **25** marks.
3. Except for diagrams that must be in pencil, all writing must be in blue or black ink.
4. Cellular phones and any unauthorized materials are **not** allowed in the assessment room.
5. Write your **Name in Full** on every page of your answer booklet(s).

FIRST JOINT PRE–MOCK 2025

FEB2025

1. You have been provided with a plain mirror, watch glass, scalpel or knife and specimen K. Close your mouth and then use the mirror provided to observe different sense organs around your face and answer the questions that follow.
   (a) (i) Apart from the eyes, name three sense organs that you have observed around your face.
   (ii) State the stimulus that each of the sense organs in a(i) above detects and specify the response brought about by it.
   (b) (i) Which of the sense organs named above is the largest of all?
   (ii) Briefly explain four non-sensory functions of the organ named in b(i) above.
   (c) Using a scalpel or knife, cut the specimen K into thin slices and put them into a watch glass. Lift the watch glass containing the slices of specimen K and hold it about 10cm from your eyes for 3 minutes.
   (i) Name the fluid substance secreted by your eyes during the procedure above.
   (ii) Give two functions of the secretion produced by your eyes during the procedure above.
   (d) Open your mouth widely and observe inside it using the plain mirror provided. Draw a neat diagram of the sense organ you have observed inside your mouth. Label the position where each of the five primary tastes is detected.
   (e) Explain the danger that a person would encounter if the sense organs studied in this experiment stop functioning.

2. You have been provided with the specimen **A, B, C** and **D**. Observe them carefully and then answer the questions that follow.
   (a) (i) State the common names for each of the specimens provided.
   (ii) Classify specimen **B, C** and **D** to class level.
   (b) (i) Briefly explain three unique features of the kingdom in which specimen **A** dwells.
   (ii) How are the members of the kingdom in which specimen **A** belongs advantageous to other living organisms? Give three points.
   (c) (i) Why are members of the division in which specimen **B** belongs considered to be the most primitive plants on earth? Give two points.
   (ii) Carefully study specimens **B** and **C** and identify two similarities and two differences between them.
   (d) (i) Draw a well labelled diagram of specimen **B** and label only three parts.
   (ii) Specimen **C** undergoes alternation of generations. Name its dominant generation.
   (iii) Name two other members which can be placed in the same division with specimen **C**.
   (e) (i) State three observable features that help specimen **D** to be suitable for its main agent of the pollination process.
   (ii) Give two advantages and two disadvantages of the types of reproduction exhibited by specimen **D**
