SPECIAL EXAMS FROM JEPGOS-T

1. You are provided with the following:
   - A plane mirror
   - Solution **R.**
   - Test tube
   - A straw

   Perform the following experiments:

   (i) Breathe over a mirror and note what you observe.

   (ii) Put about $5cm^3$ of solution **R** in the test tube. Using a straw, breathe in the solution **R** contained in the test tube until you observe the colour change.

   (iii) Breathe over your hand palm and note the observation.

   Questions:

   (a) What is the aim of the above experiments?

   (b) State what you observed when you breathed over a mirror?

   (c) What changes did you observe when you breathed in the solution **R**?

   (d) Briefly explain what you observed after breathing over your hand palm.

   (e) What conclusion can you draw from each experiment above?

   (f) Give the name of solution **R** and explain why it made changes as observed in **1(c)** above.

   (g) List **four** differences between inhaled air and exhaled air.

2. You have been provided with specimen **A, B, C, D** and **E.** Observe and study them carefully then answer the questions that follow:-

   (a) Identify specimen **A, B, C, D** and **E** using their common names.

   (b) Name the habitat for specimen **B** and **D**.

   (c) Classify specimen **B, D** and **E** from kingdom to class level.

   (d) List down **two (2)** observable features that enable you to place specimen **C** and **D** into their respective classes.

   (e) Explain in which ways does kingdom in which specimen **A** belongs can cause detrimental effects to human being? **two (2)** points.

   (f) (i) Which phase of generation is dominant in specimen **B**?

   (ii) Name other **two (2)** members of the division into which specimen **B** belongs.

   (g) Draw a well labelled diagram of specimen **E**.

   (h) Briefly describe how specimen **E** survive in different weather conditions.
