THE PRESIDENT'S OFFICE

REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT

ARUSHA REGION TERMINAL EXAMINATION - MAY 2025

FORM ONE

CHEMISTRY

TIME: 2:30 HRS **MAY, 2025**

INSTRUCTIONS:

1. This paper consists of section A, B, and C
2. Answer all questions in section A, B and C, Section A carries fifteen (15) marks and section B carries seventy (70) marks and section C carries fifteen (15) marks.
3. All writings must be in blue or black ink pen while drawings should be in pencil.
4. Write your name on every page of your answer sheets.

SECTION A (15 Marks)

Answer **all** questions in this section

1. For each of the items (i) – (x) choose the correct answer from the given alternatives and write its letter beside the item number in the space provided.

(i) Chemistry is the branch of science deals with:-

A. Living things and non-living things.
B. Life and matter.
C. Composition, structure and properties of matter.
D. Decompostion of organic matter.

(ii) A person at home can apply chemistry in:-

A. Watching television.
B. Playing games.
C. Dusting the floor in a house.
D. Cooking food in the kitchen.

(iii) The following are some disciplines which are related to chemistry EXCEPT:-

A. History and Psychology.
B. Biology and Physics.
C. Agriculture and Geology.
D. Mathematics and Enviromental science

(iv) Some experments required powdery chemicals which apparatus will you use to make them available out of the given granules?

A. Pestle and filter funnel.
B. Round bottomed flask and trough.
C. Mortar and pestle.
D. Spatula and filter paper.

(v) A laboratory technician gave form one students list of laboratory apparatus and asked them to drop those do not relate with chemistry. Which list could be dropped?

A. Crucible, lid, beaker and trough.
B. Burrette, pipette, and conical flask.

C. Test tube rack, tongs and wash bottle.
D. Microscope, prism and drawing board.

(vi) Furaha wash her uniforms and hanging on the rope, After several hours her uniforms become dried. What changes of the state of matter occurs in Furaha's uniforms?

A. Gas to solid. C. Liquid to solid.
B. Liquid to gas. D. Solid to liquid.

(vii) Amount of air entering the Bunsen burner is controlled by:-

A. Collar. C. Barrel.
B. Air hole. D. Gas inlet.

(viii) Imagine that your playing a chemistry-related trivia game with your friends. If you are to choose one term which does not relate to any recognized branches of chemistry among the following, which term could you choose?

A. Organic chemistry.
B. Arithmetic chemistry.
C. Inorganic chemistry.
D. Physical chemistry.

(ix) A form one student saw a symbol of skull with crossed bones on a box. This box is most likely to contain:-

A. A petrol
B. Charcoal
C. Rat poison
D. Acid

(x) For a fire to start three must be the components which are:-

A. Fuel, heat and oxygen.
B. Fuel, water and oxygen.
C. Heat, oxygen and temperature.
D. Fuel, oxygen and air.

2. Match the descriptions of list A with the corresponding response in List B by writing the letter of the correct response item in the table provided.

LIST A	LIST B
(i) Melting. (ii) Sublimation. (iii) Condensation. (iv) Ionisation. (v) Vapourisation.	A. Conversion of substance from a liquid to a vapour. B. Conversion of substance from liquid to solid. C. Changes of state of matter from solid directly to gas or vapour. D. Change of state of matter to from gas to liquid. E. Conversion of atoms to free ions. F. Conversion of substances from gaseous state directly to solid state. G. Changes of state of matter from solid to liquid.

SECTION B. (70 Marks)

Answer **all** questions in this section.

3. Using example of chemical substance explain how chemistry is commonly applied in your society (Give 5 point)
   (i)……..
   (ii)…….....
   (iii)……
   (iv)…….....
   (v)……
4. How does chemistry related with the following fieds?
   (i) Agriculture
   ……
   (ii) Medicine
   ……..
   (iii) Communication and technology
   …….
5. Give reasons to support each of the following:-
   (i)A laboratory should have large windows
   (ii)Concentrated chemicals should not be poured into the sinks
   (iii)Laboratory should be equipped with working fire extinguishers
   (iv)Do not use dirty apparatus
   (v)Turn off all gas or water taps after using

6. a)How could you help your fellow student who faint (Give all procedures)
b)Most of chemistry laboratory apparatus are made from glass. What could be the reason behind? (Give five points)

7. a) Differentiate the following terms by giving one point in each
   (i)Fire from combustion
   (ii)Luminous flame from non- Luminous flame

(iii)Fire extinguisher from fire fighting

b) A truck carrying kerosene was involved in an accident and unfortunately fire broke with explanation, suggest the fire extinguisher which are NOT suitable to use.

c) Complete the table below by filling the gaps

class	Burning materials	Suitable extinguisher	Chemical composition
A		Air pressurized water	
	Cooking oil and fats		Potassium acetate
C		Carbondioxide extinguingusher	

8. (A) Safety signs are very important in laboratory. List down three safety signs and give their meanings.
   (B) What would happen if there were no safety signs chemicals found in school laboratory.
   (C) A part from school laboratory, where else can we found safety signs?

9. a) Classify the apparatus according to their uses

Apparatus of measurement	Apparatus for storage	Apparatus for testing

b)Give the uses of the following components of first aid kit

Component **uses**

i. Gloves _____
ii. Sterile gauze _____
iii. Antiseptic _____
iv. Cotton wool _____
v. First aid manual _____

SECTION C. (15 Marks)

10.a)You are walking along the road and met a child hitted by a motorcycle and there is no one to help that child. As a form one students which items of first aid kit will you use to help that child (05 items)

b) What are the importance of action you take to that child (05 points)
