PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
KILOSA DISTRICT COUNCIL
FORM ONE TERMINAL JOINT EXAMINATION
CHEMISTRY 1

TIME: 2:30 HOURS **JULY, 2022**

INSTRUCTIONS

1.This paper consists of sections A and B
2.Answer all questions.
3.Section A carries twenty(20) marks and section B carries eighty(marks)
4.Cellular phones and any unauthorized materials are not allowed in the examination room

SECTION A (20marks)

Answer all questions in this section

1. For each of items (i)….(x), choose the correct answer from among the given alternatives and write its letter in the answer sheet provided

i. Matter is anything which has mass and occupies
   A. Place
   B. Space
   C. material
   D. Air

ii. Most of apparatus in the laboratory are made by
   A. wood
   B. glass
   C. Ceramic
   D. metal

iii. How is the amount of air entering in the Bunsen burner controlled?
   A. By adjusting the barrel
   B. By adjusting the collar
   C. By adjusting the jet
   D. By adjusting the base

iv. Used to support apparatus such as burette
   A. Tripod stand
   B. Test tube holder
   C. Retort stand
   D. Crucible

v. Prediction or possible explanation which can be tested
   A. Observation
   B. Hypothesis
   C. Data analysis
   D. Conclusion

vi. Can produce both luminous and non-luminous flame
   A. Gas stove
   B. Kerosene stove
   C. Spirit burner
   D. Bunsen burner

vii. Used to protect eye from chemical spills
   A. Safety goggles
   B. Sterile gauze
   C. Wire gauze
   D. Filter paper

viii. The following are solid state of matter except
   A. ice
   B. wood
   C. milk
   D. stone

ix. a state of matter whose particles are tightly packed together
   A. Liquid
   B. gas
   C. Solid
   D. Aqueous solution

x. Heat source which produces non-luminous flame
   A. Tin lamp
   B. Gas stove
   C. Hurricane lamp
   D. Firewood

2. Match the the uses of First Aid kit in List A with respective items in List B by writing the letter of the correct response below the corresponding item number in answer sheet provided

LIST A	LIST B
i. Secure bandages	A. Thermometer
ii. Cleaning and drying wounds	B. Antiseptic
iii. Treating fungal infection	C. Liniment
iv. Reducing pain	D. Torch
v. Measuring body temperature	E. Plaster
vi. Covering wounds to protect them from dirt and germs	F. Gentian violet
vii. Washing hands, wounds and equipment	G. Cotton wool
viii. Cleaning wounds to kill germs	H. Whistle
	I. Sterile gauze

ix. Reducing muscle pain x. Soothing chapped skin	J. Scissors K. Petroleum jelly L. Soap M. Bandage N. Pain killer O. Safety pin

i	ii	iii	iv	v	vi	vii	viii	ix	x

SECTION B (80 Marks)

3.a)What is flame?

b)Give 4 uses of non-luminous flame.

4.a)Define the term apparatus

b)Name use of each of the following apparatus

i. Crucible
ii. Wire gauze
iii. Evaporating dish
iv. Mortar and Pestle

5.Give reason for the following

i. Laboratory exit should open outward
ii. When doing experiment in the laboratory it is important to wear safety googles
iii. Test tubes should be placed in test tube rack
iv. Some of laboratory apparatus like crucible are made of porcelain material
v. Luminous flame produces soot

6. a)Define the following terms

i. Dependent variable
ii. Independent variable
iii. Controlled variable

b)Briefly explain 4 application of scientific procedure

8.Give 5 differences between physical changes and chemical changes

9.Classify the following as Physical changes or Chemical changes

i. Burning of paper
ii. Rotting of apples
iii. Freezing of water
iv. Frying of egg
v. Evaporation of water from seas

vi. Drying of wet clothes
vii. Dissolving salt in water
viii. Fermentation of sugar
ix. Souring of milk
x. Crushing of chalk into fine powder

10. Draw diagram of the following apparatus
    i. Test tube
    ii. Beaker
    iii. Wire gauze
    iv. Tripod stand
    v. Measuring cylinder
