INSTRUCTIONS

1. This paper consists of sections A, B and C.
2. Answer all questions in this paper.
3. Write your name on every page of your answer sheet provided.
4. All writing must be in blue or black ink **EXCEPT** for the diagrams which must be in pencil.

SECTION A:

1. For each of the items (i) – (x), choose the correct answer from the given alternatives and write its letter in the space provided besides the items.

(i) Chemistry is the study of:- ( )
A: The chemical used in the laboratory B: Experiment carried out in industries
C: The composition, structure and properties of matter. D: All scientific processes

(ii) What name is given to people who study chemistry? ( )
A: Scientist B: Chemistry student C: Pharmacists. D: Chemists

(iii) Fainting is a sudden loss of:- ( )
A: Consciousness B: Confidence C: Weight of body D: Water in the body.

(iv) Before a practical session:- ( )
A: Do not enter the laboratory without permission B: Do not taste or smell chemicals. C: Report any accident however small it may be D: Do not use dirty, cracked or broken apparatus.

(v) Burns caused by hot liquid or vapour are called:- ( )
A: Injuries B: Sears C: Scalds D: Wounds.

(vi) A non-luminous flame has:- ( )
A: Four zone B: Three zones C: Two zones D: Only one zone.

(vii) The importance of the barrel of the burnsen burner is that it is:- ( )
A: Where gas and air mixture burn. B: Where air enter the burner C: Where air holes can be adjusted D: Where the burnsen burner based

(viii) Factors in an experiment that can be manipulated to get desired results are called:- ( )
A: Controlled variables. B: Manipulated variables C: Dependent variables D: Independent variables

(ix) The first step in the scientific procedure:- ( )
A: Data analysis B: Problem identification. C: Hypothesis formulation D: Data interpretation.

(x) If you do not have a Bunsen burner which of the following heat sources would you use in the laboratory? ( )
A: The sun B: A torch C: Firewood D: A gas stove.

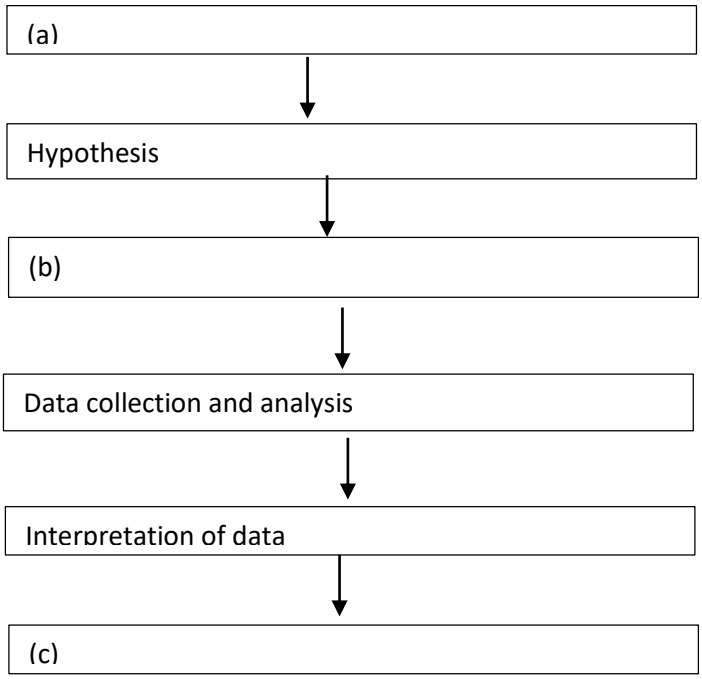

2. Match the items in List A with the responses in List B by writing the letter of the correct response in the box provided under the lists A and B.

LIST A	LIST B
(i) Pharmacists	A. Catch fire easily
(ii) Fertilizer	B. Catch fire slowly.
(iii) Vaccines	C. For treatment
(iv) The source of light in the laboratory	D. It prevent diseases
	E. Person dealing with fishing
(v) Flammable	F. Person dealing with medicine
(vi) Toxic	G. Flame
(vii) Harmful	H. Torch
(viii) Luminous flame	I. The last step in scientific procedures
(ix) Conclusion	J. The first step in scientific procedures
(x) Blue in colour	K. Produce soot
	L. Does not produce soot
	M. Non-luminous flame
	N. Harmful or poisonous
	O. Dangerous and can cause death

SECTION B

Answer all questions in this section

3. (a) Define the following terms
   (i) The scientific procedure (ii) Hypothesis (iii) Experiment (iv) Controlled variables
   (a) List down six main step in scientific procedure by considering the order.
4. (a) Define the following terms
   (i) First aid (ii) First aid kit
   (b) List down five components of first aid kit and provide their uses.
   (c) List down five importance of first aid.
5. (a) What do you understand by the following terms:-
   (i) Laboratory (ii) Apparatus (iii) Chemistry laboratory
   (b) Mention three characteristics of good laboratory
   (c) List down five laboratory rules.
6. (a) Define the following terms
   (i) Flame (ii) Luminous flame (iii) Non-luminous flame
   (b) List down four sources of heat in the laboratory.
   (c) Make five differences between luminous flame and non-luminous flame
7. (a) Draw the following diagram and provide their uses:-
   (i) Toxic (ii) Harmful (iii) Radioactive (iv) Flammable (v) Oxidant
   (b) Give the uses of the following components of first aid kit.
   (i) Water (ii) Torch (iii) Pain killer (iv)Whistle (v) Liniment
8. (a) Define the following terms
   (i) Burns (ii) Suffocation (iii) Choking (iv) Bruises (v) Fainting
   (b) Give the uses of the following chemistry laboratory apparatus.
   (i) Test tube holder (ii) Test tube rack (iii) Tets tube rack (iv) Tongs (v) Fainting.
9. (a) What do you understand by the following terms.
   (i) Chemistry (ii) Chemists (iii) Pharmacists
   (b) List down four importance of studying chemistry.
10. Copy the flow chart below and fill in the missing steps in the scientific procedure.

THE END

BEST WISHES
