Candidate's name/ Index number ……

THE PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
LONGIDO DISTRICT

FORM ONE TERMINAL EXAMINATION
032 CHEMISTRY

Time: 2½ Hours **Friday, 23rd May 2025 p.m.**

Instructions:

1. This paper consists of sections A and B with a total of ten (10) questions.
2. Answer **ALL** questions in the spaces provided.
3. All writing must be in blue or black ink, except drawing, which must be in pencil.
4. Cellular phones and any unauthorized materials are **not** allowed in the examination room.
5. Write your **Examination Number** at the top right corner of every page.

SECTION A (15 Marks)

1. Choose the most correct answer among the given alternatives and write down the answer in the space given.

(i) What name is given to people who study chemistry
   A. Pharmacist
   B. Chemisit
   C. Chemist
   D. Chemisist

(ii) One of the following is an alloy formed from a mixture of copper metal and tin:
   A. Steel B. Brass C. Bronze D. Silicon

(iii) Solvent can be obtained from a solution by
   A. Evaporation followed by decantation
   B. Filtration and condensation
   C. Evaporation and filtration
   D. Evaporation and condensation

(iv)_____ is the general term used to explain a mixture of different metals.
   A. Alloy B. Allotrope C. Amphoteric D. Amorphous

(v) The following products are made in the factories by using the knowledge of chemistry, except:
   A. Toothpaste and soap
   B. Sand and firewood
   C. Chalks and clothes
   D. Beers and soda beverages

(vi) Matter is made up of
   A. Gases and liquid only
   B. small particles that are stationary
   C. Solids and liquids only
   D. small particles that are largely not stationary

(vii) Which of the following is not a chemical process?
   A. Ripening of fruits.
   B. Rusting.
   C. Sublimation.
   D. Rotting of fruits.

(viii) The following are applications of chemistry except
   A. Gold mining
   B. Preservation of foods
   C. Oiling machine parts
   D. Making tooth paste

(ix) On his first experiment, Seypalm dissolved sulphuric acid in water and heat was evolved. In his second experiment he dissolved sugar in water and no heat was evolved or absorbed. He concluded that: -

A. His first experiment was a physical change
B. Both of her experiments were physical changes
C. His second experiment was a chemical change
D. His first experiment was a chemical change

(x) The following is a set of substances that undergoes sublimation when heated:

A. Ammonium chloride and sodium chloride
B. Iodine and dry ice
C. Ice and ammonium chloride
D. Water and ethanol.

ANSWERS

List A	(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x)
List B										

2. Match the mixtures in list A with the correct separation method in list B.

LIST A	**LIST B**
(i) An alloy formed by iron (metal) and carbon (non-metal). (ii) An alloy formed by copper (metal) and tin (metal). (iii) An alloy formed by copper (metal) and zinc (metal). (iv) A substance that dissolves in a liquid is called a (v) A liquid that dissolves something	A. Air B. Suspension C. Solvent D. Steel E. Brass F. Bronze G. Solid H. Solute I. Colloid

ANSWERS

List A	(i)	(ii)	(iii)	(iv)	(v)
List B					

SECTION B (70 Marks)

3. (a) Define matter

……

……

(b) Students at Seypalm secondary school were asked to outline main points of the kinetic theory of matter, but they all failed. Help them to answer the question.

i. ……

……

……
……
ii. ……
……
……
iii. ……
……
……

4. (a**)** Explain two ways mixtures can be categorized

i. ……
……
……
……
ii. ……
……
……
……

(b) Describe an emulsion

……
……

5. (a) What is an element?

……
……

(b)

(i) Each element has been assigned a shorthand to represent it. With one accompanying example, state three rules used when doing that.

i. ……
……
……
ii. ……
……
……
……

(ii) Write symbols for each of the following elements:

Name	Symbol
Lithium	
Sodium	

Potassium	
Magnesium	

6. State any four differences between solution and suspension

Solution	Suspension

7. (a) Give any four differences between a physical change and a chemical change

Physical change	Chemical change
(i)	
(ii)	
(iii)	
(iv)	

(b) Briefly explain two reasons that air is a mixture and not a compound.

(i) ……
……
(ii) ……
……

8. (a) Define Chemistry?

……
……

(b)

(i) Briefly explain three other fields where Chemistry is applied.

……
……
……

(ii) Outline any the three materials or products made by using the knowledge of Chemistry.……
……
……

9. Give differences between seawater and pure water in terms of the properties of their components or constituents, their composition characteristics, nature of their formation, and properties of the substances compared to the properties of their constituents.

Sea water	Pure water
(i)	
(ii)	
(iii)	
(iv)	

SECTION C (15 MARKS)

10. Chemistry is divided into several branches in order to enable specialization and making Chemists more competent when dealing with various aspects of the discipline. Explain four branches of Chemistry and state why scientific skills are required in Chemistry.
