# MKALAMA DISTRICT COUNCIL

## FORM ONE TERMINAL EXMINATION

## CHEMISTRY

**TIME: 2:30 HRS** **MAY 2025**

---

1. This paper consists section **A, B , C** with a **ten (10)** questions
2. Answer **all** questions in all sections
3. Section **"A"** and **"C"** carry (15) marks and section **"B"** carry (70) marks
4. All writing must be in **blue/black** ink except drawing in a pencil

## SECTION A (15 MARKS)

01. For each of the items (i)- (ii), choose the correct answer from the given alternatives and write its letter in the answer sheet provided:

wazaelimu.com

I. Chemistry deals with?

(a) Physical properties of matter (b) Chemical properties of matter (c) Composition and decomposition of matter (d) Experimental base ( )

II. The following are the products made from chemistry application in medicine field except?

(a) Pesticides (b) drugs (c) vaccines (d) food supplements ( )

III. The first aid item which reduce muscles pains is? (a) pain killer (b) liniments (c) petroleum jelly (d) gentian violet ( )

IV. The following are not the measuring apparatus? (a) Pipette (b) Measuring cylinder (c) Booker (d) Thermometer ( )

V. Painting is sudden loss of? (a) Confidence (b) Body weight (c) Water in the body (d) Consciousness ( )

VI. A form one students saw a flammable sign in a box. This suggest that the box is most likely to contain (a) Firewood (b) Papers (c) Radioactive materials (d) Spirit used in lamp ( )

VII. Your chemistry teacher denied a students to enter the laboratory because of floppy clothing. This is because the cloth may? (a) Be blown by wind (b) Affects measurements (c) Catch fire or one cause to fall (d) Cause poor ventilation in the body ( )

VIII. A person at home can apply chemistry in? (a) Playing games (b) Watching television (c) Dusting floor in a house (d) Cooking food in a kitchen ( )

IX. Which is warning sign relate directly with mercury? (a) Toxic (b) Corrosive (c) Irritant (d) Radioactive ( )

X. A long handled spoon used to heat the small amount of substances inside a jar is called

(a) Spatula (b) Scooper (c) Deflagrating spoon (d) Crucible ( )

02. Match the item in a list **"A"** with a correct response in a list **"B"** by writing a later of correct response as shown below.

| **LIST A** | **LIST B** |
|---|---|
| i. Organic chemistry | (a) Study of matter, energy and interactions between the two |
| ii. Inorganic chemistry | (b) Study of carbon compounds |
| iii. Analytical chemistry | (c) Study of chemical characteristics of the non- carbon compound. |
| iv. Biochemistry | (d) Study of the chemical process that occur in living things |
| v. Physical chemistry | (e) Study of biochemical process that occur in a natural environments |
| | (f) Study and uses of instruments and methods used to separate , identify and quantify chemical species in a matter |
| | (g) Deals with relations between physical properties of substances and their chemical composition and transformation by using laws and concept of physics |

## SECTION B (70 mark)

answer all questions in this sections

03. (a) what is chemistry laboratory?

(b) Imagine you have been given a chance to advise the school building committee on how should the laboratory building look like. What could be your advice? (4 points)

(c) Why laboratory rules are so important?

(d) Why the chemistry laboratory exists / doors should open outside?

04. (a) What is first aids?

(b) Why first aid is so important (write 4 points)

(c) You as chemist, what precaution will you take when help a person burns (4points)

05. (a) state one uses of each of the item (i) – (v) in administering first aids

(i) Soap (ii) Bandage (iii) Sterile gauze (iv) Iodine tincture (v) Petroleum jelly

(b)Give one function of each of the following apparatus in the chemistry laboratory

06. (a)Outline 5 areas where chemistry knowledge and skills can be applied

(b) State (5) importance of chemistry in your daily life?

07. (a) Why danger a like to occur if a laboratory user failed to follow laboratory safety measure. (5 points)

(b) How safety signs prevent accidents and injured in the laboratory?

08 Why should chemicals in the laboratory be labelled and always well closed? (5points)

09 Using examples of chemical substances explain how chemistry is commonly applied in your community (5 points

## SECTION C (15 MARKS)

10. Draw and state the meaning of the following sign

(a) Corrosive (b) Flammable (c) Toxic (c) Explosive (c) Oxidant
